

FACULTY SENATE EXECUTIVE COUNCIL

Resolution on University Staff Identification Cards

WHEREAS the university staff identification card is an official identification for access to university facilities and services; and

WHEREAS there are significant differences between the status and responsibilities of faculty (or research staff) and other staff members; and

WHEREAS researchers are often asked to establish their credentials for access to research materials at libraries, archives, and other facilities nationally and internationally; and

WHEREAS the Graduate Council had already passed a resolution similar to the one below;

BE IT RESOLVED that the Faculty Senate strongly urges that university-issued identification cards identify employees as either staff or research staff or faculty.
